

Mechanical Engineer (Intermediate / Senior)

About Republic

Republic Architecture Inc. is a creative and inclusive team. We are passionate about our work and committed to a collaborative approach to design and practice. Driven by the journey, we utilize an explorative process that connects all the right people around the table. Our desire to produce thoughtful and sustainable projects that engage the public is at the heart of everything we do.

Position

We are looking for an **Intermediate / Senior Mechanical Engineer** to join our growing multidisciplinary team in Winnipeg. This is an exciting opportunity for a driven and motivated individual to help shape, grow, and define our engineering team. Duties for this role include:

- Assessing and evaluating existing mechanical systems.
- Designing mechanical building systems for renovation and new build projects.
- Collaborating with design team and mentor design staff to produce schematic design, design development, tender, and construction documents that meet the project requirements within the allocated schedule and budget.
- Preparing equipment specification packages and technical project deliverables, reports, and presentations.
- Collaborating with in-house and external design consultants to ensure overall successful project delivery.
- Overseeing development of design concepts and ensuring proper application and execution.
- Providing quality control and review of mechanical design development and construction drawings.
- Providing site support, including field verification during construction and vendor fabrication assistance.
- Ensuring firm-wide protocols and standards are followed.
- Maintaining and expanding current knowledge of technologies and trends, as they apply to applicable projects and continually strengthening skills.

Qualifications

Preference will be given to a Professional Mechanical Engineer who has strong design skills, is motivated, agile, and has a thorough understanding of multidisciplinary coordination throughout design and construction. Working knowledge of Revit MEP for the production of drawings is preferred. Training will be provided as required. A minimum of 4 years of related experience and a registered membership with a provincial engineering association is an asset.
