

### REVIT + BIM TECHNOLOGIST (Architectural or Engineering)

**Republic** is not your average design firm. Driven by the journey, we utilize an explorative process that connects all the right people around the table. Our desire to produce thoughtful and engaging projects is at the heart of everything we do.

If you've met our team, visited our studio, or checked out our social media posts, you know we are unique. Dedicated to elevating and maintaining the health and wellbeing of our team, the studio is decked out with fitness equipment, the kitchen is stocked with healthy snacks, and work areas range from cozy café style lounge spaces to ergonomically friendly sit/stand desks. While the studio is an inviting and creative space, our work can happen anywhere – we allow for remote work and flexible schedules. These are just a few of the things that make us different. We also have social groups, monthly team events, and so much more.

The **Revit + BIM Technologist** will be responsible for the production and review of construction drawings in Revit. Your key responsibilities will include:

- Participating in the building design process from project inception through to design, construction documents, and construction administration.
- Setting up the initial Revit model with site context according to Republic's BIM standards and guidelines.
- Identifying and resolving building technology issues.
- Conducting site visits to verify compliance with drawing sets and specifications.
- Delivering a diverse range of project typologies across the country.
- Maintaining company-wide BIM standards.
- Collaborating with client groups and a multi-disciplinary consultant team.
