

Architect (Bilingual English/French)

Republic is not your average design firm. Driven by the journey, we utilize an explorative process that connects all the right people around the table. Our desire to produce thoughtful and engaging projects is at the heart of everything we do.

If you've met our team, visited our studio, or checked out our social media posts, you know we are unique. Dedicated to elevating and maintaining the health and wellbeing of our team, the studio is decked out with fitness equipment, the kitchen is stocked with healthy snacks, and work areas range from cozy café style lounge spaces to ergonomically friendly sit/stand desks. While the studio is an inviting and creative space, our work can happen anywhere – we allow for remote work and flexible schedules. These are just a few of the things that make us different. We also have social groups, monthly team events, and so much more.

Responsibilities

As a member of the architectural team, the **Architect** will be responsible for the development of enclosure designs for existing building remediations, upgrades, and new construction projects. This role includes:

- Collaborating with like-minded architects, interior designers, and technologists;
- Preparing written recommendations for remedial work, or assemblies for retrofit and new work;
- Preparing technical drawings for owner review and costing, tender and construction;
- Collaborating alongside a broad, multidisciplinary consultant team, and our client groups; and
- Balancing a desire for design excellence, sustainability and cost effectiveness.

Tell us why you're our next **Bilingual Architect**. Send your resume to: careers@republicarchitecture.ca

Qualifications

Preference will be given to a well-rounded individual who strives to push design innovation through responsible and sustainable architecture, has demonstrated success in producing building projects with technical proficiency, and has strong verbal and written communication skills in both English and French. Candidates should be Winnipeg based and have:

- Minimum two years of experience as a licensed professional with a Canadian provincial architectural association;
- Experience with BIM software, specifically Autodesk Revit is an asset;
- Strong technical design and problem solving skills;
- Experience with the production of construction documents for a variety of new construction and renovation/retrofit projects; and
- A proven track record of maintaining high quality standards.
