

DESIGN TECHNOLOGIST (Architectural or Engineering)

Republic is not your average design firm. Driven by the journey, we utilize an explorative process that connects all the right people around the table. Our desire to produce thoughtful and engaging projects is at the heart of everything we do.

If you've met our team, visited our studio, or checked out our social media posts, you know we are unique. Dedicated to elevating and maintaining the health and wellbeing of our team, the studio is decked out with fitness equipment, the kitchen is stocked with healthy snacks, and work areas range from cozy café style lounge spaces to ergonomically friendly sit/stand desks. While the studio is an inviting and creative space, our work can happen anywhere – we allow for remote work and flexible schedules. These are just a few of the things that make us different.

As a **Design Technologist**, you will be responsible to support our building condition assessment and design teams through the following key responsibilities:

- Reviewing buildings to document existing conditions.
- Preparing written reports based on observed conditions and background information.
- Coordinating, compiling, and editing reports as part of a multi-disciplinary team.
- Preparing responses to client comments and questions.
- Participating in the building design process from project inception through to design.
- Preparing construction documents.
- Carrying out construction administration activities including conducting site visits to verify compliance with drawing sets and specifications.
- Setting up the initial Revit model with site context according to Republic's BIM standards and guidelines.
- Identifying and resolving building technology issues.
- Delivering a diverse range of project typologies across the country.
- Collaborating with client groups and a multi-disciplinary consultant team.

Tell us why you're our next **Design Technologist**. Send your resume to: careers@republicarchitecture.ca

Qualifications:

- Strong organization, communication, and writing skills.
- A 3-year architectural or engineering technology certification from a recognized institution.
- Experience in Revit and BIM, with preference given to well-rounded, highly competent users.
- Strong teamwork skills, motivated by a collaborative environment.
- Ability to multi-task effectively.
- Experience working in a design office is an asset but not a requirement.
- Experience conducting site visits to verify compliance is an asset but not a requirement.
